Not everyone has a clear idea of what they want to do after they finish school or college, and even if you do, do you know how to get started or what training you require to get the job that you want?

This booklet will show you the eight different industries that you could think about for your future career. These are all popular and growing in Essex and are important for skills and money being brought to Essex. There are different starting points within each of these industries, regardless of your qualifications, skills or experience to date.

The booklet will also provide information on the different types of learning and training courses that could be available after finishing school and college.
